PROFESSIONAL SUMMARY

Aspiring Machine Learning Engineer, Data Science and Backend Python Developer with Good knowledge of Python and modern web technologies. Experienced in developing intelligent models, analyzing datasets, and building scalable backend applications. Passionate about creating data-driven solutions and continuously learning new technologies.

EDUCATION

B.Tech, Computer Science Engineering, LJ UNIVERSITY, Ahmedabad (2024 –2028)

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, SQL

Machine Learning: Supervised Learning, Pandas, NumPy
Web Development: React.js, Express.js
Tools: VS Code, Jupyter Notebook, Git

TECHNICAL PROJECTS

Bharatiya Janta Mart – Java E-Commerce Platform

- Developed a console-based E-Commerce application using Java, JDBC, and MySQL with Customer, Seller, and Admin modules.
- Implemented a custom cart management system using Double Linked List and Stack data structures in Java.
- Built secure features including OTP-based login, PAN validation, wallet management, and billing generation.
- Designed and managed a MySQL relational database for products, orders, transactions, and user records.

Tripzza – Full-Stack Travel Booking Platform

- Developing a full-stack Tour & Travel Management System with customer and admin portals.
- Implementing secure authentication, booking management, and payment tracking features.
- Building analytics dashboards and automated PDF invoice/ticket generation.
- Integrating PostgreSQL database for real-time data management and notifications.
- Designing scalable and user-friendly travel booking workflows.

AgroVision – AI Powered Smart Agriculture Platform (Ongoing)

- Currently developing AgroVision, an AI-powered smart agriculture platform for farmers.
- Working on a Machine Learning-based crop recommendation system using weather and historical crop data.
- Designing a farming dashboard with market prices, weather forecasts, and crop analytics.
